ABOUT ME

I'm a frontend developer passionate about blending precision and elegance in digital design. Specializing in sleek, interactive interfaces, I turn ideas into refined digital experiences that resonate with users and developers alike. Let's collaborate on bringing your vision to life with innovation and tasteful design.

PROJECTS

Weather App

React, TailwindCSS, MaterialUI & APIs

- Want to know the weather data of virtually any city on earth? I worked with two APIs to enable just that. Forecast data is presented elegantly, something that's not common in many weather apps out there. [Visit](#)

Calculator App

React, TailwindCSS, Redux, & MaterialUI

- This application handles the basic arithmetic calculations. A calculator is one of the most interactive applications out there because it's made up of just buttons. I had a great opportunity to learn state management with Redux while building this app. [Visit](#)

Todos App

React, TailwindCSS & MaterialUI

- This application helps you to track your chores or tasks in a neat way. You can add and remove your todos. It was a great experience to learn about the CRUD pattern in React. [Visit](#)

Portfolio Site

React, MUI, TailwindCSS & EmailJS

- This is my personal portfolio, where I display my skills, my projects as well as my education history. [Visit](#).

EDUCATION

2016 - 2022 | Murang'a University of Technology

Bsc Software Engineering

2012 - 2015 | St. JOSEPH'S HIGH SCHOOL

B+

EXPERIENCE

2016 - 2022 | Farmers' Choice LTD

Information Technology Intern

SKILLS

- JavaScript
- React
- Redux
- TailwindCSS
- MaterialUI
- Framer Motion
- HTML
- CSS

LANGUAGES

- English
- Swahili
- German (basic)
